

PLAN AHEAD WITH OUR HEALTHCARE COST ESTIMATOR

HOW TO GET STARTED WITH THE HEALTHCARE COST ESTIMATOR:

- + Login to your BlueAccessSM member portal account.
- + Click on either the “Find a Doctor” link on the BlueAccess homepage, or click the HealthCare Cost Estimator tile on the “Member Tools” page.

GET COST ESTIMATES CUSTOMIZED TO YOUR HEALTH BENEFITS

- + Search more than 1,400 common medical procedures.
- + View cost estimates tailored to your copay, deductible and out-of-pocket status.
- + View provider ratings and patient reviews.

When you’re planning to have a medical procedure, many things go through your mind. You’re probably thinking about finding the right hospital or doctor – or how this might impact your budget.

That’s why we’ve developed our new HealthCare Cost Estimator – to help inform your decision-making process. Our new tool lets you search for procedures, find providers in your network and view expected procedure costs – all in one place.

Take Control of Your Health Care Budget

The tool provides cost estimates on more than 1,400 common medical procedures. It customizes the estimates to your specific health benefits, factoring in things like your copay, deductible and out-of-pocket status.

To make sure our estimates are as realistic as possible, the tool factors in other services you may need when having the procedure – things like hospital stays, lab work, anesthesia and follow-up doctor visits. While your actual costs can vary depending on your unique health needs, it will help you plan ahead for upcoming medical expenses.

All-in-One Approach to Finding the Right Care

Our HealthCare Cost Estimator also provides information on provider and facility ratings, plus reviews from other patients. The tool provides the same consistent experience whether you’re accessing it from your smart phone, tablet or desktop computer.
