

Vision Plans

Whether you need new glasses or specialized care, our vision plans can help you get the care you need.

Find out how your plan works

If you have a CompMED or Preferred Provider Plan medical plan, you have a PPO vision plan. You can go to vision providers such as ophthalmologists, optometrists, and opticians who participate in our network.

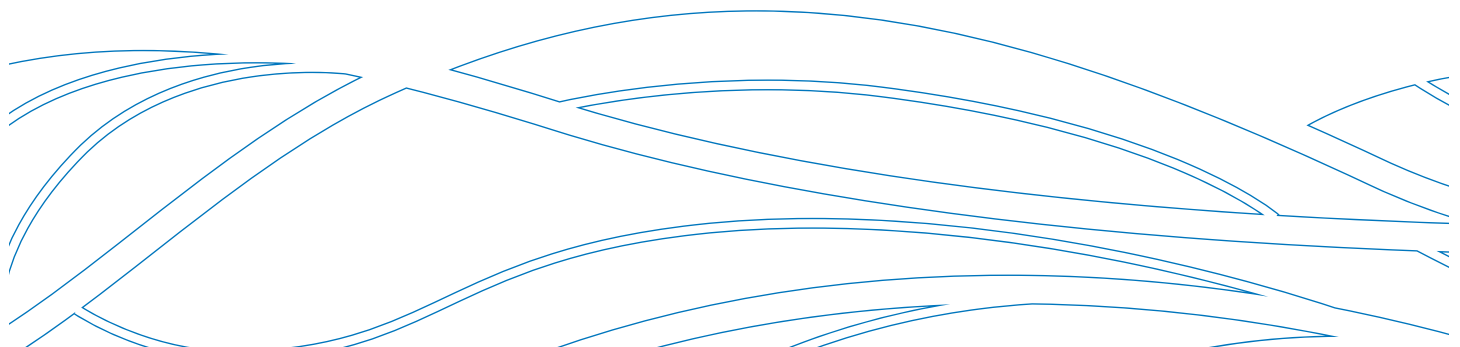

If you have a Health Plan Hawaii plan, you have an HMO vision plan. You can see participating vision providers in the HMO vision network.

See what your plan pays for

Our vision plans help pay for annual eye exams, contact lenses, contact lens fittings, and eyeglass frames. To learn more, see your plan's *Guide to Benefits* on hmsa.com.

Find an eye doctor

Go to hmsa.com and click Find a Doctor to search for a provider. Search for the type of vision provider or optical dispenser you need and select your vision plan.
